Continuous Deployment Proposal

Benefits

- Reduced Cost

- Faster Delivery

- Better Quality

Reduced Cost

- Developers spend less time deploying code and more time delivering value

- Automatic clean up of unused resources

Faster Delivery

- No need of manual intervention

- Encourages small and frequent code changes meaning the value is delivered faster

Better Quality

- Automatically testing each code change before deployment

- Encourages smaller code changes
  ◦ Less likely to introduce bugs
  ◦ Easier to identify bugs which means they are fixed faster
